

2025 SPONSORSHIP OPPORTUNITIES

**BRAIN ANEURYSM
FOUNDATION**

Brain Aneurysm Foundation: Atlanta Run/Walk

OCTOBER 5, 2025 | BROOK RUN PARK, DUNWOODY, AG

The Brain Aneurysm Foundation has been the leading voice in the fight against brain aneurysms for 30 years. The BAF aspires towards a life without death or disabilities caused by brain aneurysm ruptures through increased awareness, education, support, advocacy, and research funding. With your support we can continue to improve outcomes and save lives!

OUR IMPACT

AWARENESS

Through public awareness campaigns, events, and educational initiatives, we strive to increase understanding of brain aneurysms, the risk factors, signs and symptoms.

EDUCATION

7,500 primary care professionals from around the nation are educated each year by the Brain Aneurysm Foundation via PriMed. The program consistently receives positive feedback and has proven to be life-saving.

SUPPORT

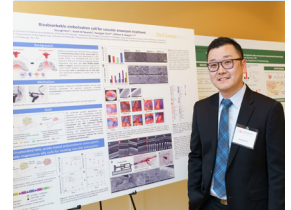

We offer resources, guidance, and emotional support to individuals and families affected by brain aneurysms, including educational materials, and support groups for survivors, caregivers, and those who have experienced loss.

ADVOCACY

We advocate for greater brain aneurysm specific research funding through NIH. Brain aneurysms are among the most underfunded disease research projects in the U.S.

RESEARCH

Since the inception of our grant program in 2007, we've funded nearly \$6 million in research projects that advance the understanding of brain aneurysms, improve early diagnosis, and explore treatment options.

SPONSORSHIP LEVELS

\$5,000

EVENT DAY EXPOSURE

- Company logo on walk t-shirts*
- Verbal recognition during speaking program
- Prominent logo placement at welcome and registration tent(s)
- Two branded yard signs to be displayed along the walk route

\$500

DIGITAL BENEFITS

- Company logo on event website sponsor scroll

*Logo must be received by September 5, 2025, for inclusion on t-shirts

Why partner with the Brain Aneurysm Foundation?

It is estimated that up to **1 in 50 people** in the U.S. will develop a brain aneurysm during their lifetime.

Ruptured brain aneurysms are fatal in about **50% of cases**. Of those who survive, about 66% suffer some permanent neurological deficit.

The federal government spends only **\$2.94 per year** on brain aneurysm research for each person afflicted.

Brain aneurysms are treatable, which is why identifying an aneurysm before rupture is critical. With research and appropriate scanning, we can all get a step closer to preventing ruptures, disability, and death.
